

November 2018

Our Youtube channel offers you different video resources about topics that can help you in your personal development. Take a look!

Results of the Flipping First pilot

The Lights of flipping the classroom

The general feeling of the students and the teachers who have used Flipped Classroom has been quite positive. Several tests show that this method can combine with other methods. We have seen that, if the students maintain appropriate interest and the way of working at home is adequate, the results can improve significantly.

This project has worked mainly with VET students and teachers, but we found out that applying this method to early childhood and secondary education can also give great results. Some comments of teachers and students have added that

traditional teaching can be defined as "very flat", and suggest that the use of technology can make students feel an important part of the educational process, increasing their motivation and participation. Using technology can encourage students to learn more actively.

For example, a Spanish teacher indicated: "When learning the lesson at home, it helps the students to be more motivated in class and have a desire to work", concluding that, if the student receives the theory in class, he can disconnect and waste time unnecessarily. Flipped Classroom may even, at

certain times, accelerate the learning process by allowing the student to receive the lesson in the right place at the right time for him. This can encourage concentration and a willingness to learn. In conclusion, it has been highlighted that the general feeling about traditional education can be defined as "demotivating" and "flat". The Flipped Learning proposal facilitates the entire educational process from the student's point of view, providing them with freedom of time and place to learn.

This creates an additional motivation in them when facing the learning process.

Flipping First in Youtube

Your online resources for the flipped classroom

One of the points of our project funded by Erasmus+ has been the creation of online resources.

Now, the Flipping First project gives you more than 150 videos, presented in 5 languages (English, Hungarian, Spanish, Polish and Flemish) and 3 topics (Teacher Training, Entrepreneurship and Tourism).

All these videos are completely free and available in our Youtube channel under Creative Commons CCO license. Visit our Youtube channel in the following link:

Activities for the classroom

Answer the following Questions

Flipping First has made a multi-language Moodle system of courses for applying the Flipped Classroom method. Here, you can find activities and more information about how you can apply this method to your students if you are a teacher, or full Tourism and Entrepreneurship courses if you are a student. You can access our Moodle platform in the following link:

The partners Exponential Training & Assessment

Exponential Training & Assessment is an on-line learning provider based in the UK with learners in over fifty countries. We specialise in delivering business coaching, management and leadership and consulting qualifications accredited by the Chartered Management Institute. Our aim is to make a difference to the personal and professional performance of our learners. This means ensuring our learning programmes are practical, enjoyable and engaging and to achieve this we make extensive use of technology-based learning tools. We believe that location should never be a barrier to learning and development therefore we are champions of on-line learning and remote learning and assessment and of course flipped learning.
